PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 5+ years of expertise in Python, FastAPI, Django, and modern React. Passionate about building high-performance microservices, clean REST APIs, and integrating machine learning models into user-friendly web dashboards.

CORE SKILLS & TECHNOLOGIES

Key Competencies: Python, Django, FastAPI, Flask, JavaScript, TypeScript, React, REST API, PostgreSQL, Redis, Docker, Git, CI/CD, AWS, Machine Learning, Scikit-Learn, Pandas, HTML5, CSS3, Agile, Unit Testing

WORK EXPERIENCE

Lead Backend Engineer - CloudPeak Systems (2020 - Present)

- Designed asynchronous microservices handling 2M+ requests/day with Python, FastAPI, and Redis caching.
- Integrated scikit-learn predictive scoring models into real-time customer analytics dashboards.
- Managed Docker containers and automated GitHub Actions CI/CD workflows.

Full Stack Developer - ByteWave Solutions (2018 - 2020)

- Developed interactive web applications using React, Python, Django, and PostgreSQL.
- Implemented secure JWT authentication and role-based access control systems.

EDUCATION

Bachelor of Technology in Computer Science - University of Illinois, 2018
